

RUS WELD

International Exhibition
for Welding and Cutting Equipment,
Technologies and Materials

18-21.10.21

www.rusweld-expo.ru/en

12+

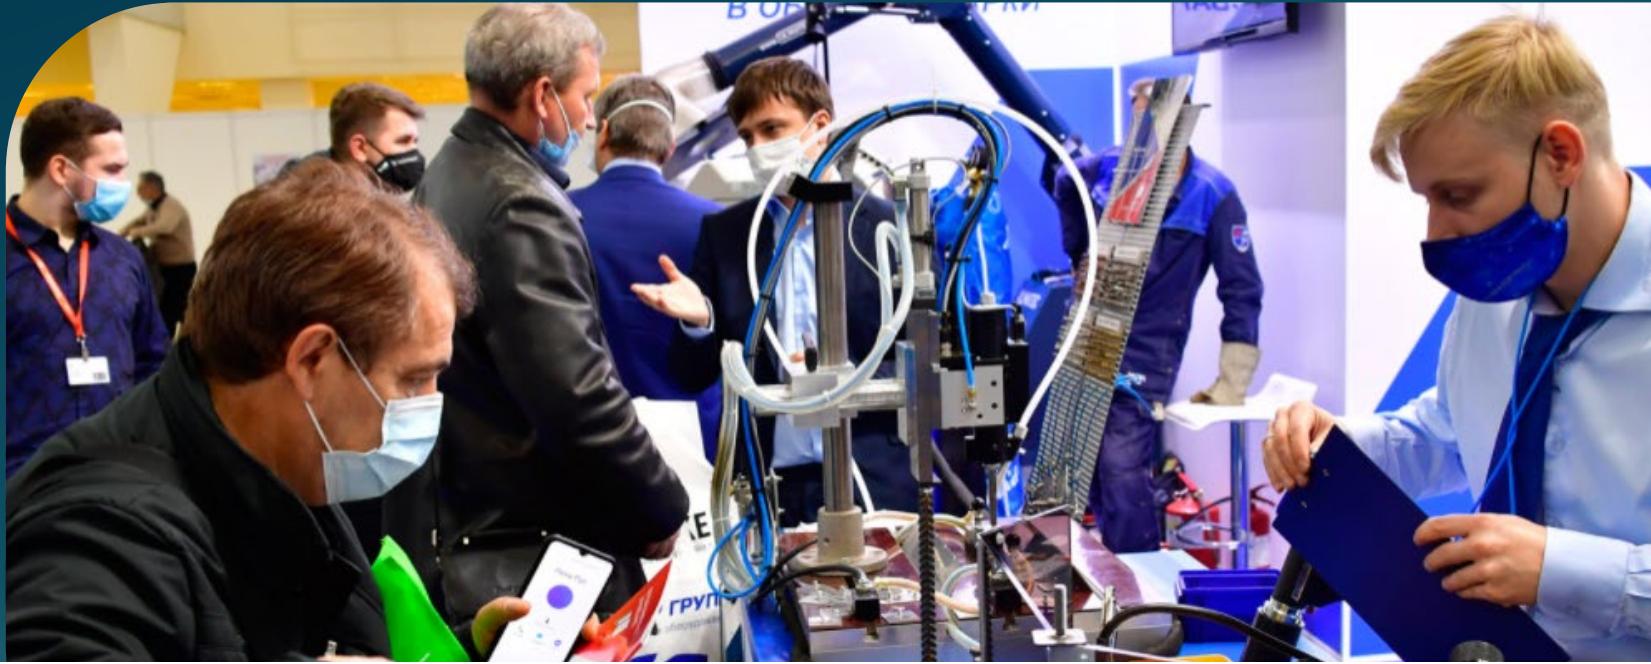

Organised by  EXPOCENTRE

Under auspices of

Product Sectors

- ❖ Welding equipment, materials, and technology
- ❖ Metal cutting equipment and materials
- ❖ Industrial robots: robotic welding stations and welding robots
- ❖ Post-treatment, renewal and improvement of wear resistance of products and structures
- ❖ Quality control in production: joint defects, product compliance with regulations and requirements
- ❖ Welding tools and devices
- ❖ Personal and collective protection equipment for welding
- ❖ Air purification equipment and technology, air conditioning systems

Facts and figures

40

participants
from 8 countries

3,506

visitors

Feedback

**Dmitry Kuraksa,
Managing Director of ESAB
in Russia and the CIS:**

- During the period of stagnation that we had since the end of March, there was a limited number of live events related to networking with clients. We are grateful to the exhibition organisers for the fact that they created this platform and gave us the opportunity to network live. We missed such communication. We are interested in meeting customers, listening to them not by modern means of high-speed video communication, but live, face to face. We are grateful for this opportunity. We believe that further development is in safe hands and we will move together.

**Andrey Voronin,
Director General
of Rutekh OOO:**

- You should not skip such events, because there are tasks that we need to solve together. So we even invited our partners from Finland. They have arrived to this exhibition in order to get acquainted with the objectives of our clients in more detail and to find the best solutions that will fit today's conditions.

**Nikolay Alyoshin,
President of the National
Agency of Welding Control,
RAS Member:**

- The Internet can't replace live exhibitions. Exactly exhibitions allow us to understand where we are, in what direction we should move. We need also foreign experience . Today the United States, England, Japan, China produce half of the national GDP with welding. Welding will develop, and Russia, the motherland of welding, won't say the last word.

Event Programme

- Conference on Industrial Welding and Additive Manufacturing
- Panel on Welding as Part of Digital Manufacturing
- Conference on Metrological Support and Standardization of Modern Means and Technologies of Non-Destructive Testing and Condition Monitoring (NDE 4.0)

Venue – EXPOCENTRE Fairgrounds

165,000
sq m of total
