Product Sectors

- ✦ **Welding equipment, materials, and technology**
- ✦ **Metal cutting equipment and materials**
- ✦ **Industrial robots: robotic welding stations and welding robots**
- ✦ **Post-treatment, renewal and improvement of wear resistance of products and structures**
- ✦ **Quality control in production: joint defects, product compliance with regulations and requirements**
- ✦ **Welding tools and devices**
- ✦ **Personal and collective protection equipment for welding**
- ✦ **Air purification equipment and technology, air conditioning systems**

Feedback

Alexey Nuzhny,
Regional Finance Director,
ESAB (Russia & CIS)

"This is our second year at Rusweld. It is very good that it has become part of Russian Industry Week. It allowed our company to have contact not only with people involved in metal welding, but also people with other competences. We walked through the show, and it was nice to see how the Russian industry presents its new products and technologies. We have a good location for our stand, so we are happy to be here today and present our company. Let's hope that we will continue to maintain a good relationship with this great venue in the future."

Dmitry Ipanov,
CEO, Vektor Group

"I enjoyed the show. I am grateful to the organisers that in these difficult pandemic conditions, it was held for the second year in a row. We plan to continue to take part in this show. We have generated many new clients and made many business contacts. We would like to see even more new clients next year."

Nikolay Alyoshin,
President of the National
Agency of Welding Control,
RAS Member

"The Internet cannot replace in-person trade shows. These shows make it possible to understand where we are and in what direction we need to move. Foreign experience is also necessary. Today, the half of national GDP is produced by welding in such countries as the USA, the UK, Japan, and China. Welding will develop further, and Russia, where the modern welding was invented, will have a say in it."

Conference Programme

More than
10
events

- The Conference on Industrial Welding and Additive Manufacturing
- The Panel on Welding as Part of Digital Manufacturing
- The Conference on Metrological Support and Standardization of Modern Means and Technologies of Non-Destructive Testing and Condition Monitoring (NDE 4.0)
