CONFERENCE PROGRAMME

INLEGMASH International Industry Conference

An effective discussion platform to identify industry trends, find suppliers and new sales channels for textile and garment industry equipment and technology

Gathers government officials, financiers, top managers, specialists from Russian and international companies, leading technologists, scientists and developers

A practical tool for presenting foreign and Russian innovative technological developments to the industry market

568 industry professionals took part in the 2nd INLEGMASH International Industry Conference

DIGITAL FACTORY

(jointly with SMART-T)

INLEGMASH implements a unique project Digital Factory, which is a real prototype of a working digital textile factory. Throughout the exhibition, a separate stand demonstrates the full cycle of modern digital apparel production from design and printing to cutting and sewing of finished garments. This allows all aspects of modern digital production to be clearly demonstrated to industry professionals.

SMART-T

ПЛЕТМАШ

HAMCORE

INLEGMASH 2022 was organised according to the salon principle, reflecting the demands of a professional audience: 'Textile Machinery, Materials and Other Services', 'Garment Equipment Salon', 'Textile Printing Equipment Salon'.

For the first time, the exhibition featured the Consulting and Educational Centre supported by the Kosygin Russian State University.

The centre provided an opportunity for aspiring specialists, young staff and students to feel part of the industry community.

An important event at the INLEGMASH 2022 exhibition was the signing of a cooperation agreement between EXPOCENTRE AO and the Kosygin Russian State University (Technology, Design and Art).
