WHAT OUR EXHIBITORS SAY

[See all feedback here](#)

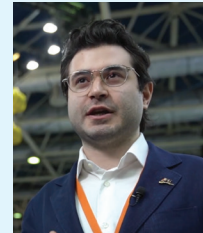

Valery Odegov
Director General,
Atomic Soft

"Neftegaz is the key venue where we demonstrate our achievements to the broadest range of clients and partners. The wide spectrum of exhibitors helps us understand the industry's trends and tasks. This information is important for adjusting our strategic development plans."

Dmitry Kupriyanov
Director General,
Elektroshield – TM Samara

"This year, Neftegaz is one of the major exhibitions our plant takes part in. Traditionally, we use this venue for meetings of the company management with the maximum number of clients operating our equipment. We receive feedback, which is crucial for our enterprise. The exhibition brings together representatives of all regions of Russia. Foreign delegations visit it this year. We also see all our rivals and, of course, it is interesting to know how they develop and what path they take."

Ammar Magomedov
Mospromgaz Deputy Department Head,
MOSGAZ

"We are taking part in Neftegaz for the first time. Above all, Neftegaz is a platform where we can speak with colleagues, clients and buyers and discuss current problems of the oil and gas industry. The exhibition is international, and it is useful to exchange practices with foreign colleagues. There are lots of contacts, clients and requests. We have never expected to see such interest in our company. We have achieved our goals already but we will keep working for the remaining three days of the exhibition."

Igor Poluektov
Director for Marketing and Advertising,
Buran Group

"We have been taking part in Neftegaz for years. And I should say that the exhibition grows, develops, and offers new services that allow businesses to feel confident and make their performance more successful year after year. To us, the exhibition is not a mere image event. We communicate a lot with partners at the exhibition, as it is important to us to understand their objectives. This is the venue where we make market research and understand what partners need. The exhibition is a marker of the trend in the national oil and gas industry and key goals of buyers and mineral developers, our clients. We use it to adjust our strategy and our policy for this market. The new venue of Neftegaz will unlock new opportunities for us."
