TESTIMONIALS

[See all testimonials here](#)

Valeriy Odegov

Director General, Automiq Software

"This show is a good platform for a large number of our partners, customers, and competitors to meet in one place. During the meetings, several new promising ideas were born. We will work to turn these preliminary agreements into real business cases."

"We see quite a lot of interest from the participants, from the visitors to the show, and interest in what various companies present at this event. This platform is a key one for us. We plan to continue participating in the next Neftegaz editions."

Denis Nikitin

Head of the Business Development Department,
Goreltex Zavod

"Goreltex Zavod has been participating in Neftegaz 2026 for more than 20 years. This year we are presenting new products from our product range, in particular, automation systems. This is a new direction and a new development for us."

"The show is organised at a high level. There are comfortable halls, a large flow of visitors. It is nice to show our competitors once again what we will be capable of in the near future."

"Neftegaz allows not only to get acquainted with new products, but also to network during its conference programme. Of course, this is a must-attend show."

Damir Yanberdin

Director General, Ufagidromash

"I would like to welcome all my colleagues at Neftegaz. This year we show an automatic robot with an added machine vision. Our hydraulic equipment, distributors, and hydraulic motors are also displayed. Many people do not even know that we can manufacture them. Of course, we talk about it and show it at the exhibition."

"I really like this show. Many different people and many different companies come here. And this, of course, has a positive effect on us."

Evgeniy Savin

Chair at the Board of Directors, EKM Holding

"Today is another day at Neftegaz 2026. This is a really good format, where we have held a huge number of meetings. Our company came with a new product, showed it to our customers. We have already signed several good contracts for the supply of cable and wire products. This shows that we are still alive, we are still successful, and we are still moving forward."

"This show is an important event for us. As soon our marketers finish this show, they will start preparing for its next edition."
