PHOTONICS

WORLD
OF LASERS
AND OPTICS

21st International Exhibition for Laser, Optical and Optoelectronic
Technologies

30 March — 1 April 2027

Timiryazev Centre, Moscow, Russia

Photonics is Russia's best exhibition in the Optical Industry. Lasers category in all nominations of the Russian National Exhibition Rating

Nikolay Evtikhiev
President at the Laser
Association

"Photonics is a platform that clearly shows how the industry is developing and which solutions are ready for implementation. Here we can see that interest in laser equipment is growing, new industrial and medical developments are emerging, and more and more attention is being paid to personnel training. It is especially important that the show's participants discuss not only technologies, but also their practical application in manufacturing, education, and medicine. This is a good sign as the exhibition confirms that photonics is in demand, which means that it has great prospects for growth and implementation in various fields."

Ivan Kovsh
Honorary President
and Advisor to the Board
at the Laser Association

"The widespread practical development of photonics technologies is essential for the socio-economic development of our country, as evidenced by both international and domestic experience. We hope that Photonics. World of Lasers and Optics will once again actively contribute to this development."

Results of Photonics 2026

163

exhibitors from 4 countries

7,400

 sq. m
of exhibition space

6,973

visitors

D

- Displays, equipment for light shows

E

- Equipment for machine vision, sensors, detectors

F

- Fibre optic equipment

H

- Hologram hardware and materials

I

- Innovation centres, technology transfer centres

L

- Laser and optical equipment for measurements and testing
- Laser and optical security equipment
- Laser equipment for cutting, welding, marking and other material processing technologies
- Laser equipment for plant growing and nature management
- Laser medicine

- Laser radiation sources and their components
- Laser technologies for advertising, production of gifts and souvenirs
- LEDs, lighting engineering, illuminating and lighting systems

N

- Night vision equipment, optic and laser sights

O

- Optical elements, components, systems
- Optical materials and processing technologies
- Optical systems for data logging, storage, processing and transmission
- Optoelectronics, nanophotonics

P

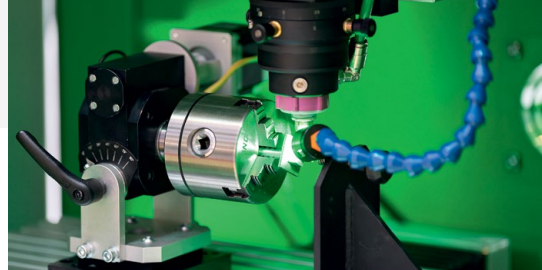

- Photoelectronics, solar energy

R

- Research equipment

S

- Servicing of laser and optical equipment

Photonics exhibitors are leading manufacturers and suppliers of lasers and optics

Our exhibitors include

- Akmetron
- Avesta
- Azimut Photonics
- Azmerit
- Bauman Moscow State Technical University
- Bulat
- Crystaltechno
- Doksard
- Dukhov Automatics Research Institute (VNIIA)
- Elan+
- Engineering Group
- ETM Photonics
- Fotonika NPK
- Innfocus
- Inscience
- Instrumentation Engineering Group (GKMP)
- Laser Center
- Laser Components
- Lasers and Devices
- Lazerform
- LLC
- Moscow Institute of Physics and Technology
- Optics, Optoelectronics and Laser Technology
- Perm Scientific and Industrial Instrument Making Company
- Photonics Systems
- Sharplase
- Shvabe
- SLAS Prime Technology
- Solar Laser Systems
- State Scientific Metrology Institute (VNIIOFI)
- VPG Laserone

Statistics of 2026

163

companies from 4 countries

Russia

Armenia

Belarus

China

Photonics is the most attended event in Russia's laser and optical industry

6,973 industry professionals from **24** countries and **67** regions of Russia attended the show in 2026

94%

of visitors would recommend Photonics to partners and peers

78%

of visitors found the products/solutions they were interested in

76%

of visitors attend no more than one laser and optical show per year or only Photonics

More than 50%

of visitors plan to make purchases post event

attendees

Detailed
programme

Organised by the Laser Association and EXPOCENTRE AO

Nikolay Evtikhiev

President at the Laser Association

"The 20th edition of Photonics is a vivid confirmation of 20 years of sustainable industry development and continued high interest in it. There is growing attention to photonics, especially laser equipment, which is rapidly being introduced into the industry. The show clearly shows that the development of laser devices is leading the way for the entire industry, from photodetectors to radiation control technologies. All these indicators show that the industry is not just functioning, but is growing steadily, despite current constraints."

Ivan Kovsh

Honorary President and Advisor to the Board at the Laser Association

"The 20th edition of Photonics is a working platform for professionals. Its participants secure orders for the next year in just three days. There is the Congress of the Photonics Technology Platform, which features 18 conferences for knowledge exchange. The show presents technologies for precision processing, ultrashort pulses, laser brush, optical memory, and information processing. The focus is on microelectronics and photonics. The job fair helps to solve the personnel shortage as students see advanced equipment, and employers find professionals."

Viktor Zhdanov

Head of Marketing at Laser Center

"Our company has been participating in Photonics for 20 years, meeting with contractors and demonstrating new products. The target audience is manufacturers, state-owned enterprises, universities and research institutes from all over Russia. The show helps to promote sales and attract customers with complex tasks. The main goal is to find new objectives and a basis for developing new technologies."
